

Amaze yourself.

Amaze the world.

Strategic Data Solutions Intern

Job Summary

Do you want to be part of a team critical to the success of Apple? Are you a Science, Technology, Engineering, Mathematics, or Business major who is passionate about leading challenging engineering projects? Do you want to apply your educational experience to real world problems? Do you dream at night of your future in a role at the most influential technical company in the world. If you handle pressure and timelines with ease; are a great teammate; and are passionate about the future... we're looking for you!

Job Description

As a member of the Strategic Data Solutions team, you'll responsible for managing engineering or infrastructure projects. You will work closely with the engineering team and contribute in high level design discussions regarding system architecture and features. In accordance with your area of study, we'll match you to an internship project related to project management, business process engineering or process optimizations. Partnering with an experienced teammate, you will push the boundaries of what's possible together.

Our commitment to you: We will provide you with a challenging opportunity that you will be proud to have accomplished at Apple. We will provide you with mentorship and teammates that will prepare you for a future role in a large corporation. We will provide you with exposure to senior leadership and partners. We will expose you to extraordinary character-building leadership programs that will prepare you for future leadership opportunities.

What we expect: High energy, never say die attitude. Bring your A-Game every single day and be prepared to be the best version of you. Bring your creative energy and be prepared to challenge and be challenged to go above and beyond.

You will perform all or some of the following:

- Participate in core project team discussions
- Create or update user stories / business requirements for systems development
- Responsible for overall project quality on any new development or enhancement
- Collaborate with other functional area experts to drive project execution

- Review technical solutions/designs provided by others
- Collaborate with Engineering Team and/or Systems Team

Key Qualifications

- Passion for managing technical projects
- Fundamental understanding of Agile Development processes
- Ability to understand design patterns to daily work and effectively communicate them
- Ability to develop high quality, fast to market solutions
- Ability to write user stories, epics and documentation
- High level understanding of NoSQL and Big Data technology is highly desirable
- Ability to communicate effectively to both technical and non technical people
- Ability to work independently as well as within a team
- Experience with team sports / activities beneficial
- Community participation, including volunteering, desirable
- Flexible, Adaptive, Persevering attitude required

Education

Currently pursuing a degree in Engineering, Science, Technology, Mathematics, Business or related field with equivalent experience. Returning to a degree-granting program after your internship.

Apple is an Equal Employment Opportunity Employer that is committed to inclusion and diversity. We also take affirmative action to offer employment and advancement opportunities to all applicants, including minorities, women, protected veterans, and individuals with disabilities.
