iOS Car Experience Engineering Intern

Job Summary

Are you passionate about both iOS and cars? The iOS Car Experience team is looking for an enthusiastic, highly motivated engineer to share his or her expertise in application and framework development. Along with excellent skills in object-oriented software design and programming, you are expected to have real-world experience building applications, frameworks or tools for iOS. You will be responsible for prototyping and implementing new features in existing applications as well as developing complex applications or tools from top to bottom (user interface design to design and implementation of supporting frameworks).

Key Qualifications

- You have strong object-oriented programming experience (Obj-C, Swift, C++)
- Creativity and enthusiasm for design
- Possess excellent communication skills
- Strong debugging and analytical skills
- Comfortable with a large code base, dynamic working environments, and tight schedules

Description

You will join a hands-on development team that cultivates creativity and generates novel solutions to deliver engineering excellence. We partner with a variety of cross and multi-functional team members from a diverse array of groups across the company. Are you deeply accountable for your work? Your passion for product ownership and track record of product development will prove critical to your success on our team. You have excellent judgment and integrity with the ability to make timely and sound decisions. Ability to stay focused and prioritize a heavy workload while achieving extraordinary quality. You are upbeat, adaptable, and results oriented with a positive attitude.

Responsibilities Include:

- User interface, application, framework programming
- Bringing together requirements and recommending system solutions
- Coordinating strategies with internal partners
- Resolving complex interdisciplinary problems
- Basic understanding of the OS, graphics, networking, and other sub-systems
- Automotive industry experience and/or experience shipping high-volume consumer products

Education

BS (completed or in progress) in computer science, EE or equivalent
